Education

Northeastern University | Master of Science in Information Systems **|** Expected December 2026

- Database Management, Application Testing, UI/UX Design, team collaboration

Rutgers University | Bachelor of Arts in English Literature, minor in Psychology | Graduated 2019

Projects

Tarot Card Reader | **View App** | React, Vite, JavaScript

- Built an interactive tarot card reader with custom CSS flip animations, hover states, and staggered reveal timing that mimics a physical card draw.
- Optimized mobile and desktop layouts using responsive grids, ensuring smooth performance across devices.
- Implemented dynamic interpretation logic with card reversal probability to personalize each reading.
- Selector for two types of readings: Three-Card Spread and the Celtic Cross for more advanced state and object management.

Spectral Shots Photography | View App | React, Tailwind CSS, Vite, TypeScript, TanStack Router

- Designed a portfolio website for a photography business with mobile-first responsive layouts.

Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frameworks & Libraries:** React, React Native, Node.js, Tailwind CSS
- **Build Tools & Version Control:** Vite, Git, GitHub
- **Testing & APIs:** Firebase
- **Design & UX:** Responsive Design, Mobile-First Development, Component-Based Architecture, Object-Oriented Design and Programming, UI/UX Principles
- **Workflow & Collaboration:** Agile/Scrum, Jira, Slack, Microsoft Teams
